

Version 2022.1

2022-2026 STRATEGIC PLAN

TINKER'S CREEK
WATERSHED PARTNERS

APPROVED: DECEMBER 9, 2021

LAST UPDATE: DECEMBER 9, 2021

THIS PAGE INTENTIONALLY BLANK

ACKNOWLEDGEMENTS

Tinker's Creek Watershed Partners owes its achievements to the generous involvement of our many partners, collaborators, staff, and Board. We are grateful for the foundation set by the past members of our staff and Board. Partnerships make our work possible. We would like to recognize the Cuyahoga River Area of Concern Advisory Committee, the working group Northeast Ohio Public Involvement/Public Education, the Central Lake Erie Basin Collaborative, our Northern Ohio Watershed Corps host sites, the Northeast Ohio Regional Sewer District, and our member communities. TCWP couldn't achieve its mission without the dedicated base of volunteers who offer their time and skills each year.

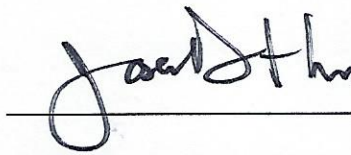

This strategic planning process was made possible by the current dedicated Board of Directors and staff in addition to our facilitator Cindy Carty of CLCarty Consulting. We hope the time and care that went into this plan serves the current and future stewards of this region.

Signatures

BOARD OF DIRECTORS

Ana Burns, President

Josh Herchl, Past President

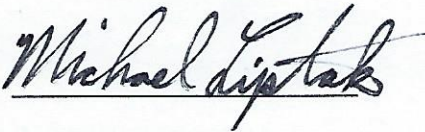

Jim Rodstrom, Member

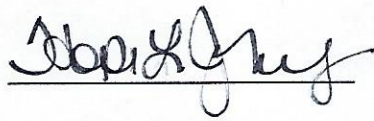

Katherine Holmok, Vice President

Sandy Barbic, Member

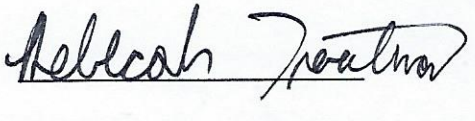

Jennifer Syx, Member

Michael Liptak, Treasurer

Hope Jones, Member

Becah Troutman, Member

Samantha Robbins, Secretary

Chad Reel, Member

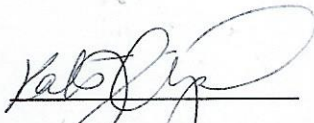

Maureen Wise, Member

STAFF

Harry Stark, Executive Director

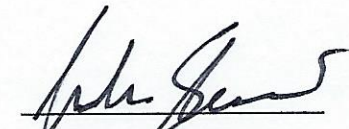

Kate Chapel, Senior Project Manager

Sara Borse, Admin & Fundraising Coordinator

Kelli Herrick, Watershed Coordinator

Julie Stark, NOWCorps Program Manager

Background

Tinker's Creek Watershed Partners (TCWP) was originally Tinker's Creek Land Conservancy, a nonprofit organization that held land and easements for watershed protection. On January 1, 2006, Tinker's Creek Land Conservancy merged with seven other conservancies to do business as Western Reserve Land Conservancy. The Tinker's Creek Land Conservancy Board recognized the importance of continuing to have an organization dedicated to the health of the Cuyahoga River's largest tributary, so they gifted \$80,000 in seed money to establish TCWP.

In 2010, TCWP began hiring full-time staff to further its mission. Events, programs, and goals were established. By 2017, TCWP employed two full-time staff members in addition to temporary interns and part-time staff. The added capacity allowed TCWP to incorporate the Brandywine Creek watershed into its service area. Brandywine Creek communities contributed to a Non-Point Source Implementation Strategy Plan (NPS-IS Plan) that was endorsed by Ohio Environmental Protection Agency (EPA) and U.S. EPA. A map of the watersheds and the active member communities are shown in Figure 1.

TCWP hosts four NPS-IS Plans (three for the Tinker's Creek subwatersheds and one for Brandywine Creek watershed) that can be found on our website. While NPS-IS Plans are project-centric, the Tinker's Creek Watershed Action Plan and Brandywine Creek Balanced Growth Plan provide more background and context to these waterways and their communities.

Figure 1: Tinker's Creek & Brandywine Creek Watersheds

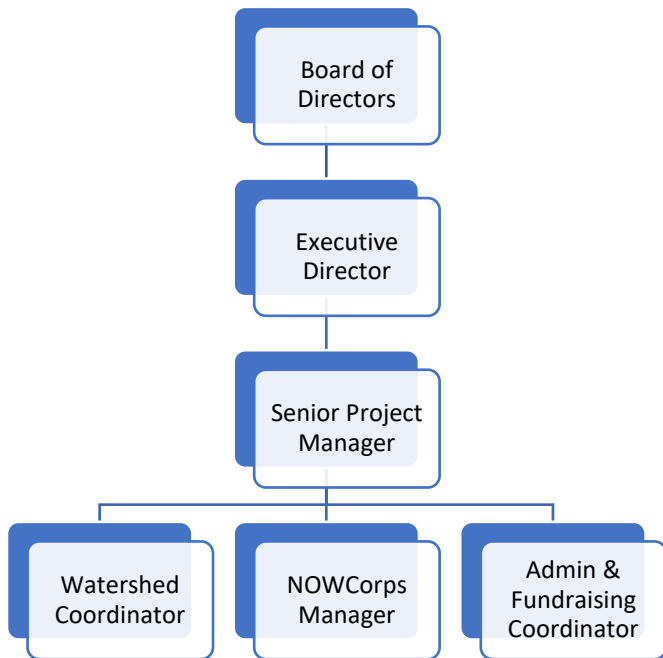

Figure 2: Organizational Chart

Tinker's Creek Watershed Partners is governed by a Board of Directors who volunteer their time and skills to help TCWP achieve its mission. The Executive Director takes direction from this Board and manages the other staff. The staffing structure is shown in Figure 2, and formal job descriptions can be found in the TCWP files.

In addition to the staff shown on this chart, the NOWCorps Manager provides oversight and support to the approximately 20 national service members that are a part of the Northern Ohio Watershed Corps. These members are not technically employees of TCWP, but their payroll is administered through TCWP.

TCWP completed two previous strategic plans in 2010 and 2016. Both plans included a survey sent to Board, staff, members, and community partners as an initial data gathering exercise. Board and staff decided to remove this step from the current strategic planning process since we now incorporate these questions and feedback into quarterly check-in meetings with our stakeholders.

Generally speaking, TCWP has accomplished the goals of both prior strategic plans. The process continues to be a useful exercise to realign and reinvigorate the group around shared values and goals. The intent of this new strategic plan is to provide guidance and direction to current and future Board and staff members, and to serve as a living document that is reviewed frequently and regularly. The adaptive management section of the plan will be used to encourage revisions and additions over the next five years.

Major accomplishments from past plans:

- Increased staff from zero full-time to four full-time and one part-time employees
- Developed several new programs and events to serve member communities and watershed residents
- Leveraged nearly \$2,000,000 in grant funding
- Thousands of linear feet of stream restored

North Stars

Mission

*To protect and restore the Tinker's Creek and Brandywine
Creek watersheds through community partnerships*

Vision

Clean Water, Healthy Habitats, Engaged Communities

Tag line

Rediscover, Respect, Revitalize

Five-Year Theme

Become the leader in community-centered environmental stewardship.
Together we will mobilize resources and capabilities to improve the health of
individuals, communities, and our environment.

Strengths, Weaknesses, and Trends Analysis

The Board of Directors and staff participated in a strengths, weaknesses, and trends analysis to inform this strategic planning process. Some of the characteristics and qualities identified in the responses can be seen as guiding principles just as significant as our public mission and vision statements. These cultural touchstones can also be seen as strengths to lean on when accomplishing our public goals.

TCWP's greatest strengths included our staff and their ability to adapt to evolving situations, the group's willingness to be flexible, and the organization's close relationships with communities and partners.

Weaknesses have also been identified in this process. Each business objective addresses these to remove barriers to our continued success.

The trends identified provide a lens to look through on our way forward. They have influenced our decisions on how we do things, what we prepare for, and new opportunities to explore proactively.

The raw data for this survey can be found in the TCWP files.

Business Objectives

A subcommittee of the Board of Directors was formed to lead the writing of this new strategic plan. That subcommittee worked with staff and CLCarty Consulting to identify objectives that will guide the next five years. More detailed work plans for each of these objectives can be found in Appendix A. The current work plan can be found in the TCWP digital files. The six business objectives that form the foundation of our strategic plan are:

1. Apply the latest science to effectively implement watershed health initiatives
2. Become a community engagement hub
3. Extend and facilitate private and public collaborations
4. Develop and implement a fundraising strategy
5. Develop and implement a marketing and communications strategy
6. Align structures and capacities with our mission and fiscal goals

Business Objectives

1. Apply the latest science to effectively implement watershed health initiatives

Introduction

TCWP develops restoration projects and prioritizes our work based on science and empirical data. We are expanding internal data collection efforts, and we use state and federal data in our planning documents.

The ultimate goal is to attain water quality standards and achieve the goals of our [NPS-IS Plans](#).

*Water quality standards (WQS): noun. provisions of state, territorial, authorized tribal or federal law approved by EPA that **describe the desired condition of a water body** and the means by which that condition will be protected or achieved.*

Science is an ever-evolving field, and TCWP needs to keep up with the latest data and technology to achieve our goals. In addition to the available state and federal watershed health data, we utilize citizen scientists to collect more frequent localized data. These data are incorporated into our NPS-IS Plans and work plans to ensure we are effectively implementing restoration projects and targeting priority areas of the watersheds we serve.

In addition to using good data and implementing restoration projects, TCWP will work with our communities to ensure watershed-friendly ordinances and policies are in place.

Primary Goals:

- Continually update our NPS-IS Plans
- Identify and implement priority projects

2. Serve as a community engagement hub

Introduction

TCWP will continue to serve as and expand our role as a hub for citizen science/stewardship. Our survey of staff and Board shows that a major strength is in our community partnerships. We have excellent relationships with our municipalities, stakeholders, residents, volunteers, and partner organizations. While other local watershed groups focus on land preservation or collaborative grant programs, TCWP focuses on community engagement at all levels.

Hub: noun. a center around which other things revolve or from which they radiate; a focus of activity, authority, commerce, etc.

Our NOWCorps program exemplifies how TCWP can increase community engagement and capacity building. We have leveraged a small internal staff into over 20 national service members serving throughout northern Ohio. The Ohio Stormwater Conference is another example of creating a high-profile event to convene experts, share information, and discuss solutions to our water issues throughout Ohio and the greater Midwest region.

Our ability to create and maintain relationships, build trust, implement action, and leverage resources can be a model to other watershed groups. This model can be formalized into presentations and materials to share at expanding scales over the next five years.

Diversity, equity, inclusion, and environmental justice are lenses that we need to look through to do more meaningful work. An overarching goal for this group is to include these priorities in every grant application initiative moving forward.

Primary Goals:

- Orchestrate educational and stewardship events annually in each member community
- Formalize our model of community involvement as a tool for other watershed groups
- Increase the inclusivity and accessibility of our programs

3. Extend and facilitate private and public collaborations

Introduction

In addition to our public education and outreach events, TCWP creates opportunities for the public and private sectors to collaborate, learn from each other, host events, and build understanding.

Collaboration: noun. the act of working together, especially on a goal or shared project.

A component of this objective is to increase private and public involvement in our stewardship. Our NPS-IS Plans identify critical areas for watershed improvement and protection, but federal grants are competitive and have eligibility requirements that limit where the work can occur. To complement these public funding sources, TCWP aims to increase the private funding of restoration and protection activities within the watersheds. TCWP will work with businesses in the area to ensure the stormwater best management practices are correctly built and maintained with an emphasis on native plants and water quality.

Motivations will differ between partnerships (volunteers, business, municipal, etc.), so our strategy will be tailored to each audience.

Primary Goals:

- Audit our existing events to understand gaps
- Host and continually improve the Ohio Stormwater Conference
- Use our Board's network to increase our range of partners

4. Develop and implement a fundraising strategy

Introduction

As our capacity grows, TCWP needs to evolve our fundraising strategies to sustain the organization.

Fundraising plan: noun. all of those elements comprising an organization's procedure for attaining a campaign goal including objectives, leadership requirements, timetable, personnel requirements, and budget; and the overall strategy or grand design for successful implementation of a campaign.

We will continuously diversify revenue streams to remain resilient and sustainable. One of our primary goals for the next five years is to create relationships with private foundations that are currently an untapped resource for TCWP. This business objective complements our marketing strategies to match great stories to the funding source's priorities.

Primary Goals:

- Expand our portfolio to foundations and other funding opportunities
- Evaluate our fundraising events for return on investment
- Create a robust customer relationship management database

5. Develop and implement a marketing and communications strategy

Introduction

TCWP has an incredible story to tell about our watershed's history, the value of greenspace, the streams we revive, and the people who interact with these ecosystems. We recognize the need to communicate our story more effectively to our targeted audiences (collaborative groups, volunteers, municipal, businesses, etc.).

Storytelling: noun. The act of communicating narratives to influence, teach, and inspire

Our marketing and communications efforts need to take many forms to be inclusive of the watersheds and partners we serve.

Primary Goals:

- Standardize our branding
- Develop core messaging
- Develop and implement a marketing strategy
- Upgrade platforms and software

6. Align structure and capacities with our mission and fiscal goals

Introduction

TCWP seeks to intentionally align our structure and capacities to our mission and goals. Over the next five years, we will identify gaps and inefficiencies and fill them appropriately.

Alignment: noun. the proper adjustment of the components of a system for coordinated functioning

Our existing staff and Board have a diversity of skills but are not necessarily diverse in other consequential ways. We see the following areas as focus areas for growth: fiscal, legal, informational technology, fundraising, marketing, academia/education, local political, watershed residents, age, income, lived experience, race, and ethnicity. The Board can recruit strategically to increase the representation of these areas.

To retain Board talent, we will create a handbook and orientation process for the Board of Directors. We also need to evolve the Board to meet the current needs of the organization.

We may use contacts, partnerships, and/or volunteers to use our capacity most efficiently.

TCWP will invest in its staff by providing professional development and mentoring opportunities to increase competencies.

TCWP seeks to align our Board, staff, and volunteers with the goals of this strategic plan. The alignment actions below are intended to recruit, retain, and develop our human resources.

Primary Goals:

- Restructure the Board to support the strategic plan
- Increase diversity within our Board and staff
- Maintain a culture of continual learning for Board, staff, and volunteers

Adaptive Management

Adaptive management is an ongoing natural resources management process of planning, doing, assessing, learning, and adapting. This process allows us to implement strategies, gather data, and adjust our implementation based on new information. Adaptive management is meant to be iterative, making this plan a living document that incorporates salient ideas and processes.

This section provides a placeholder for the lessons we learn over the next five years. Any major content revisions and their logic will be described here.

Appendix A: Detailed Work Plans

Strategic Plan 2022-2026 Detailed Work Plans

| | |
|------------------|--|
| Mission: | To protect and restore the water quality and habitats of the Tinker's Creek and Brandywine Creek watersheds through community partnership. |
| Vision: | Clean Water, Healthy Habitats, Engaged Communities |
| Tag line: | Rediscover, Respect, Revitalize |

Five-Year Theme:

Become the leader in community-centered environmental stewardship. Together we will mobilize resources and capabilities to improve the health of individuals, communities, and our environment.
